

## TECHNICAL DATA SHEET CFS-INTERMEDIATE COAT

**PRODUCT DESCRIPTION:** CFS-Intermediate Coat is a two component 100% (+/- 1%) solids epoxy colored coating designed for applications where high build colorfast impact resistant floor is needed.

**RECOMMENDED FOR:** Recommended for a high build intermediate coat, with optional flakes, on concrete or masonry. Product is suitable in many chemical exposure environments.

<p><b>LIMITATIONS:</b></p> <ul style="list-style-type: none"> <li>*Color stability or gloss may be affected by environmental conditions such as high humidity, low temperatures, chemical exposure or exposure to certain types of lighting such as sodium vapor lights.</li> <li>*Colors may vary from batch to batch. Therefore, use only product from the same batch for an entire job.</li> <li>*This product is not UV color stable and may discolor when exposed to UV lighting. Otherwise, the color stability of this product is good. Therefore, a topcoat CFS-High Performance Urethane is optional and dependent on the environment.</li> <li>*Light or bright colors may require a suitable primer or topcoat to achieve a satisfactory hide. Substrate temperature must be 5°F above dew point</li> <li>*All new concrete must be cured for at least 30 days prior to application.</li> <li>*Apply a suitable primer before using this product as a coating.</li> <li>*Physical properties are typical values and not specifications.</li> </ul>
